EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Thomas J. Bean on March 1, 2007.

The application has been amended as follows:
in the claims:

- claim 1, line 12 – added a comma after “joint”,
- line 13 – deleted the first occurrence of “and” and replaced the semicolon with --, and a supported portion;--,
- line 14 – replaced “a” with --the--; and
- claim 10, line 15 – added --respectively-- after “is”.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:
regarding claim 1, the prior art of record does not disclose or suggest a coupling structure comprising a plate body having a flexible member, a curved portion, and a

Art Unit: 3679

supported portion having a projection incised into at least one of a shaft joint and a locking body (lines 11-12, and lines 13-14 as amended by examiner's amendment to avoid a double inclusion discrepancy) in combination with a positioning recess of a shaft body (line 12) and a slip-off preventing groove in the shaft body (line 2). The closes prior art, Sekine et al., teach a slip-off preventing groove only and does not require a positioning recess in addition to the slip-off preventing groove;

regarding claims 2-9, these claims directly or indirectly depend from claim 1;

regarding claim 10, the prior art of record does not disclose or suggest a coupling structure comprising a supported portion extending from a curved portion of a plate body and having projection in combination with both a shaft joint body and a locking body each having a recessed portion into which one of the projections is fitted. There is no motivation absent applicant's own disclosure to modify Sekine et al. because Aota et al., as modified by Sekine et al., teach a recessed portion on a locking body only;

regarding claims 2-9, these claims directly or indirectly depend from claim 1; and,

regarding claims 11-18, these claims depend from claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
